

Data Dictionary

data/raw/ad_benchmarks.csv

Field	Description
channel	Display, Shopping, FX, Market, or Assumption
metric	The specific figure - e.g. CTR, CVR, CPC_global_usd
value	The numeric value
unit	pct, USD, INR, or rate
source	Citing report
notes	Scope/derivation notes
confidence	source_confirmed or assumption_illustrative

outputs/tables/funnel_and_sensitivity.csv

Field	Description
channel	Display or Shopping
lever	CTR, CVR, or Incrementality haircut
direction	low (-20%) or high (+20%)
lever_value	The lever's value at that perturbation
incremental_roas	Resulting incremental ROAS
delta_vs_base_roas	Change vs. the base-case ROAS

excel_model/Campaign_ROI_Simulator.xlsx

Three sheets: Assumptions (every sourced input, yellow-highlighted cells are the editable assumptions), Funnel_Model (the full funnel per channel, every cell a live formula), Sensitivity (the tornado, also live formulas referencing Assumptions).
